

With a thinner frame and slimmer design it is a sit-stand workstation arm where space is tight in your hospital.

Wall Mounts are perfect for high-traffic spaces because of their compact design. This space-saving solution is also ideal for areas where multiple operators use a single computer workstation.

Wallmounts that are strategically placed within your facility improve clinician workflow and efficiencies.

Easily take your EMR, eMAR, PACS and CPOE to the point of care.

Also available in 7" depth
